CONTENTS VOLUME 337

J. Casademunt, F.X. Magdaleno. Dynamics and selection of fingering patterns. Recent developments in the Saffman–Taylor problem 1

T. Tóth-Katona, T. Börzsönyi, Á. Buka, R. González-Cinca, L. Ramírez-Piscina, J. Casademunt, A. Hernández-Machado, L. Kramer. Pattern forming instabilities of the nematic smectic-B interface 37

P. Oswald, J. Baudry, S. Pirkl. Static and dynamic properties of cholesteric fingers in electric field 67

F. Sagués, M.Q. López-Salvans, J. Claret. Growth and forms in quasi-two-dimensional electrocrystallization 97

C. Völtz, M. Schröter, G. Iori, A. Betat, A. Lange, A. Engel, I. Rehberg. Finger-like patterns in sedimenting water–sand suspensions 117

U. Ebert, W. van Saarloos. Breakdown of the standard perturbation theory and moving bounday approximation for "pulled" fronts 139

Á. Buka, P. Tóth, N. Éber, L. Kramer. Electroconvection in homeotropically aligned nematics 157

A.P. Krekhov, T. Börzsönyi, P. Tóth, Á. Buka, L. Kramer. Nematic liquid crystals under oscillatory shear flow 171

M. Ipsen, L. Kramer, P.G. Sørensen. Amplitude equations for description of chemical reaction–diffusion systems 193

L. Casetti, M. Pettini, E.G.D. Cohen. Geometric approach to Hamiltonian dynamics and statistical mechanics 237

J.E. Lidsey, D. Wands, E.J. Copeland. Superstring cosmology 343

F. Calvayrac, P.-G. Reinhard, E. Suraud, C.A. Ullrich. Nonlinear electron dynamics in metal clusters 493
